

The image shows a two-story brick house with a dark roof. Attached to the side is a conservatory with a white-framed, multi-paned glass roof and white-framed windows and doors. A wooden bench sits on a paved patio in front of the conservatory. The scene is set in a garden with green grass and a stone border. Large trees are visible in the background. Overlaid on the right side is a decorative gold-colored floral and scrollwork pattern. In the top right corner, the text 'ultraframe' is in a simple sans-serif font, and 'Orangery' is in a large, elegant script font.

ultraframe
Orangery

For a bespoke solution to adding light and space to your home, choose the Ultraframe Orangery.

The Orangery is a new take on the traditional atrium-style conservatory, brought up to date with the very latest technology from Ultraframe. This stunning building floods the adjoining rooms with light, whilst the interior height of the Orangery creates a feeling of grandeur that is sure to appeal to the discerning homeowner.

Whilst based on traditional building technologies, the Ultraframe Orangery adds a touch of contemporary flair to any home and bridges the gap between a conservatory and an extension.

It provides a touch more privacy than a conservatory due to the brick pillars which distinguish this style. The interior height of the Orangery roof provides a breathtaking focal point through which light floods into your home, and allows for breathtaking views of the sky above.

An Ultraframe Orangery really is an exciting addition to your home, which will not only provide you with a versatile new living space, but will also add value to your property. How will you use your new room for all seasons? An Ultraframe Orangery makes a stunning kitchen, an inspirational place to work or simply a wonderful space to relax and enjoy time doing nothing at all.....

The light, bright and airy interior will add a new dimension to your home and provide a seamless link between your home and garden.

Now for the technology.....

Ultraframe offers you a choice of Orangery styles - each one subtly different externally (the look and feel internally is virtually the same).

Externally one Orangery style features tiered glazing whilst the other features a flat roof around the perimeter.

Both Orangery systems feature a structural grade aluminium roof capped and clad with low maintenance thermal pvc cappings and claddings.

The careful selection of high performance glazing ensures that the Orangery is a versatile living space which can be used all year round and can be combined with further finishing touches such as underfloor heating to create extra luxuriant comfort. All Ultraframe roof systems feature integrated ventilation as standard so you can create a comfortable interior atmosphere, whatever the weather.

Aspire to something uniquely different – enquire about the Ultraframe Orangery today.

Retail installation companies who specify and select Ultraframe's conservatory roof systems are an elite group who can design and install to the highest standards and can take care of any 'red tape' in the form of Planning Permission or Building Regulations.

Examples of typical details

Orangery - Flat roof perimeter

Orangery - Tiered glazing

Wealth Warning

Some retailers can provide a similar look but using construction techniques that:-

- Can't meet Building Regulations (assuming they apply)
- Have unproven details that structurally under perform.
- Rely on adjacent brickwork/windows for support instead of structural beams/posts

Make sure you only specify the best. Ultraframe - Tried, tested, trusted.
